

Fun Facts About Yourself: Introduction Prompts

A fun fact does not have to be astonishing. A specific, true detail about a small skill, a useful habit, or an ordinary preference can give someone an easy way to remember and continue the conversation.

Host guide / Letter / 2–12 adults / 5–15 minutes

Read the guide privately first if this activity has hidden answers. Print single-sided at Actual size / 100%. Cut only sheets marked CARDS. Keep answer keys with the host.

What you need

- Prompt cards or this page on a screen
- Paper is optional for drafting a sentence
- No scoring or recording materials are needed

How to run it

1. Pick one stem that feels easy to answer. Read it silently first if you prefer.
2. Complete it with a true detail in one or two sentences. A modest answer is enough.
3. If the group wants to continue, invite one simple follow-up about the detail rather than asking for a full life story.
4. Move to another speaker or end the round. Passing is a complete choice.

A memorable detail can be ordinary

A useful introduction gives other people a handle for a later conversation. It might be a tiny skill you use often, a harmless object you have kept, or a preference you can explain in one line. The goal is not to produce a polished “interesting fact”; it is to share something accurate that you are happy to mention.

Concrete details are easier to follow than broad labels. Instead of saying only “I like cooking,” you could name a recipe you learned by repetition or a kitchen shortcut you rely on. Keep the example yours, and avoid inventing an achievement to make the answer sound more impressive.

- Choose a detail you can share without checking a record or proving it.
- Use a small example instead of a dramatic claim.
- Skip any stem that drifts toward private or sensitive information.

A three-part answer that sounds natural

Try a simple shape: name the detail, give one small example, and stop. For instance, a person might say they are good at spotting a loose button before it falls off, then mention that they carry a tiny sewing kit. The example makes the fact specific; the short ending leaves space for someone else.

If you draw a blank, narrow the stem. Replace “What is your most unusual skill?” with “What small task have you learned to do a little faster?” You can also write a few words first and speak only if you want to.

- Detail: state one true thing.
- Example: add one concrete moment or use.
- Handoff: ask whether anyone else has a similar example, without calling on a person.

Use the cards in introductions and gatherings

At a dinner, club, or informal introduction, put a few cards face up and let each person choose. In a larger group, make a voluntary pair round before inviting anyone to speak to the room. In a remote call, paste one stem into the chat and let people answer by voice, text, or not at all.

A host can model a modest response first, but should not use the example to set a higher bar. Leave enough silence for people to think. If someone shares a detail, respond to what they said rather than evaluating whether it counts as a fun fact.

- Give people a choice between speaking, writing, or passing.
- Keep the round short and avoid collecting personal answers.
- Use follow-ups that show interest, not requests for proof.

Keep the introduction honest and comfortable

These prompts are not designed for job interviews, medical histories, or private relationship stories. They focus on everyday life and self-chosen details. If a card unexpectedly feels too revealing, skip it. If a listener wants more information, the speaker can choose how much to add.

A good group can accept an unremarkable answer without trying to make it bigger. “I know a shortcut for packing a lunch” is already a complete fact. The room does not need to rank stories, award a funniest answer, or force a second turn.

- Do not ask for someone’s address, income, health history, or family details.
- Do not turn a personal fact into a joke at the speaker’s expense.
- Let a quiet or simple answer stand on its own.

Hosting questions

What counts as a fun fact?

Any true, specific detail that you are comfortable sharing can work. It does not need to be rare, impressive, or surprising.

Can I write an answer before I speak?

Yes. Use paper to find a concise example, or simply pass. The page does not collect or score answers.

Should a host require everyone to share?

No. Offer a choice to answer, listen, write, or pass. A forced round can make a light introduction feel like a test.

Can these stems be used at work?

They are written for adult social introductions. A workplace host should choose only prompts that fit the setting and should not treat answers as performance evidence.
